

Dear friends,

We would like to invite you to our future Comenius project:

Haute Couture made of waste and wrap materials

In this project (it will start next school year 2012/2013) we would like to use these materials, that are useless anymore, for art activities. Our idea is to make fashion designs.

Activities:

- gathering of the materials and sorting them
- worksheets and questionnaires about sorting of the waste in the countries, recycling
- interschool projects concerning environmental education
- project meetings (teachers)
- making designs
- outdoor workshop of students from different countries + their teachers, photographs
- fashion show
- fashion book
- final exhibition, designs, photos

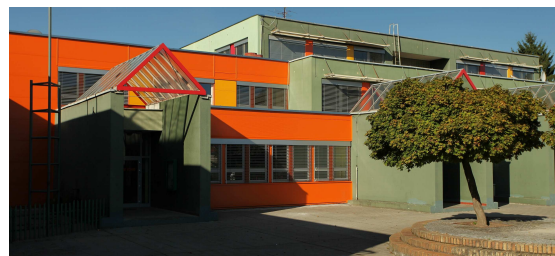

We are primary school for children 6-15 years and we also have 4 kindergardens. We have about 600 pupils here. We have big experience with making exhibitions, we make outdoor courses of art and photography and we do many other art activities. We had 3 extremely successful Comenius projects so far.

Our school is situated in one of the most beautiful towns in south Bohemia. We have many historical places here. Our town is surrounded by beautiful forests and ponds. You can see more at www.icpisek.cz

If you are interested, please contact us as soon as possible: pavlina.reinisova@zstylova.cz.

Best wishes from Písek
