TCA DESCRIPTION

Themes and goals: What is the role of blended mobility within the context of digital pedagogy and how does AI influence this, if at all? How can blended mobility be used methodically to support digital pedagogy in SE and VET institutions? Within the Erasmus+ programme, what constitutes blended mobility for SE and VET? What are the experiences of schools who have already been organising blended mobility? What are some of the reasons why other schools that take part in the Erasmus+ programme are currently not organising blended mobility? The event will be blended with an online meeting taking place a few weeks before the physical event (possibly during the week of 17-21 November). This thematic seminar is part of the LTA 2025-2027 Digital Pedagogy in the Age of AI.

Expected results: All participating NA partners are asked to conduct an analysis of the state of play regarding blended mobility in SCH and VET KA1 projects in their country before the virtual event in November. This includes the share of blended mobility of all learning mobility activities as well as additionally looking into the experiences of schools who are organising blended mobility and the reasons why those not organising blended mobility are not doing it. A questionnaire for NAs to pass to schools will be shared by the time registering begins at the latest. Participants from schools whose NAs are not partners are highly encouraged to also answer the questionnaire, which will be shared after their participation has been approved by the organising NA.

Additional information:

Important notes: The event will be held: Dec 10 - starting around lunch time Dec 11 - full day of work and activities Dec 12 - ending with lunch
